New York Stock Market

New York, May 11.—A firmer tone developed to-day in the accurities market, and price movements, though small, were in the main upward. Trading was of the same listless character as on the previous days of the week, but operators who had been persistantly bearish reversed their position to-day and supported the market. The demand, which was chiefly for the requirements of professional traders was most pronounced in United States Steel, Reading, Union Pacific, Lehlyh Valley and Erle. The change in character of trading was attributed chiefly to the attitude of the professional element, the day having passed without developments which affected stocks to an appreciable extent. The resistance of the market to unfavorable news has been one of its most striking characteristics of late, and furnished perhaps the strongest reason for the preference shown for the long side.

ing characteristics of late, and furnished perhaps the strongest reason for the preference shown for the long side.

United States Steel seemed to be the sustaining force of the list. Theoretically its position was vulnerable on account of the unfavorable showing made by yesterday's report of unfilled orders and the continued poorcharacter of trade advices. The manner in which the stock resisted attack acted as a stimulant for the rest of the market. An attempt to force a break was made at the opening, which of the large blocks of the stock were thrown on the market, but the price tarely wavered, and bear traders were forced to cover at rising prices. Some improvement in the steel trade was reported from Pittsburg, although the change is too' slight to relieve the situation. The United States Steel, Corporation, it was estimated, is operating about 61 per cent of its blast furnace capacity, a decrease of 11 per cent. from the high level of the year, reached late in March. The movement of iron ore has fallen off in consequence, despite the recent reduction in prices. Apri. shipments of Lake Superior iron one from the upper take docks were little more than one-fifth of the amount forwarded in April of last year. The copper metal market was somewhat easier to-day, prices here reflecting the weakness in the London metal market. Sales of several million pounds to demestic consumers are reported.

Trading in the bond market was somewhat heavier to-day, and the continued good demand in this department exerted a favorable effect upon speculative sentiment. Calls for bids for the government's Panama bonds are expected within a few days. In view of the plethora of money and the present low rates which prevail generally at the large centres, it is apparent that the government bonds have the without the circulation privilege, will be watched with anusual interest, since it will place government bends in competition with other investment securities.

Reports of the Erose carnings of thirty railroads for April show that the

Foreign markets were as featureless as our own. A large gain in
the proportion of reserves to liabilities of the Bank of England was
shown in the bank's weekly statement.
